

BACK BRITE PLUS

ACIDIC RIM CLEANER

DESCRIPTION:

A fast acting acidic wheel cleaner removes brake dust, rust and grime without the need for back-breaking scrubbing.

CONTAINER SIZES:

5-gal Pail, 15-30-55-gal Drum, 275-gallon Tote

PHYSICAL PROPERTIES:

| | |
|------------------|-----------|
| COLOR | Red |
| ODOR | Pungent |
| pH @ 100% | 1.0-2.0 |
| VOC's | None |
| SPECIFIC GRAVITY | 1.04-1.08 |
| FORM | Aqueous |

CAUTIONS: Corrosive

Contains Ammonium Bi Fluoride: causes severe irritation, burns and sores. Wear adequate eye and skin protection when handling. Store at room temperatures and out of direct sunlight. Do not apply to polished aluminum surfaces.

ADVANTAGES:

On contact removal of stubborn brake dust and grime minimizes the need for scrubbing.

Leave rims sparking improving the overall perception of the wash just received!

Create an extra service that will have your customers asking for it on a regular basis.

High foaming improves cling for enhanced cleaning!

ABF solution has lower odor and is not as harsh on equipment as strong HF products.

DILUTION RATIOS:

Heavy Duty Wheel Cleaner:
Apply diluted 1:2-8

Cool extremely hot wheels with water first if using at 1:2 or stronger. Do not apply to polished aluminum. Best results are achieved if rim is dry and cool before applying.
