

FINISH DRI

PREMIUM VEHICLE DRYING AGENT

DESCRIPTION:

Premium, highly concentrated drying agent with silicone removes water from old or new vehicle surfaces leaving them dry and shiny.

CONTAINER SIZES:

5-gal Pail, 15-30-55-gal Drum, 275-gallon Tote

PHYSICAL PROPERTIES:

COLOR	Yellow
ODOR	Amine
pH @ 100%	7 to 8
VOC's	<20%
SPECIFIC GRAVITY	~0.90-0.92
FORM	Aqueous

CAUTIONS:

Contains: Quaternary Surfactants. Causes extreme eye irritation. Wear adequate eye and skin protection when handling. Store at room temperatures and out of direct sunlight. Eye Irritant! Do not freeze or expose to temperatures lower than 40 °F.

ADVANTAGES:

Premium concentrate goes the distance performing on old or new surfaces.

Create noticeably larger droplet size helping air-dryers to remove the beads more efficiently reduces left over water spots.

Cold weather stable!

Improves surface gloss!

Use in low or high pressure applications.

DILUTION RATIOS:

High or Low Pressure: Dilute 1:240-1200+.

Concentration will depend on the amount of water on the surface.

Adjust until optimal performance is achieved. Start strong and slowly decrease concentration to pin point the best performance and application cost.

Fast Beading Performance!
