

MAKE SCENTS

WATER BASED FRAGRANCE ULTRA CONCENTRATES

DESCRIPTION:

Ultra concentrated fragrances designed to be used with an unscented product in a "dual draw" injection system.

Any fragrance will work due to it being injected into the water along with the detergent or drying agent lowering the pH allowing the fragrances to stay strong!

Wild cherry, lemon, fresh laundry, green apple, pina colada, island breeze, peach, grape, orange crème, evergreen, citrus burst, tropical blast and strawberry banana!

CONTAINER SIZES:

1-gallon jug, 5-gallon or 15 gallon

PHYSICAL PROPERTIES:

COLOR	Amber
ODOR	Fresh / Fruity
pH	7 to 9
VOC's	<3
SPECIFIC GRAVITY	~1.00
FORM	Aqueous

CAUTIONS: Eye Irritant

Contains: Fragrance, Surfactant and Isopropanol. Will cause irritation and dryness if gotten on skin. Do not breathe concentrated mists. Store at room temperatures and out of direct sunlight.

ADVANTAGES:

Covers offensive reclaim odors and strong chemical smells that tire cleaners, pre-soaks and drying agents can produce!

Change your fragrance options for holidays or other special occasions.

Delivers the sense of a great "cleaning" experience enhancing overall customer perception!

DILUTION RATIOS:

Dilute 1:120-480. Adjust ratio until desired scent is achieved.
