| | |
|------------------|----------------|
| COLOR | Blue |
| ODOR | Amine / Cherry |
| pH @ 100% | 7-8 |
| VOC's | <15% |
| SPECIFIC GRAVITY | ~0.94-0.96 |
| FORM | Aqueous |

CAUTIONS:

Contains: Quaternary Surfactants. Extreme eye irritation. Wear adequate eye and skin protection when handling. Store at room temperatures and out of direct sunlight. Eye Irritant! Do not freeze or expose to temperatures under 40 °F.

ADVANTAGES:

Premium concentrate goes the distance performing on old or new surfaces.

Added silicone noticeably increases repellency and shine!

Produces a mild cherry scent!

Cold weather stable!

Use in low or high pressure applications.

DILUTION RATIOS:

Low Pressure: Dilute 1:200-800+ (10-15 mL).

High Pressure: Inject 1-2 oz / car.

Concentration will depend on the amount of water on the surface.

Adjust until optimal performance is achieved. Start strong and slowly decrease concentration to pin point the best performance and application cost.
