5-gal Pail, 15-30-55-gal Drum, 275-gallon Tote

PHYSICAL PROPERTIES:

COLOR	Yellow or Red
ODOR	Orange or Cherry
pH @ 100%	7-9
VOC's	<15%
SPECIFIC GRAVITY	~0.94-0.96
FORM	Aqueous

CAUTIONS:

Contains: Quaternary Surfactants. Extreme eye irritation. Wear adequate eye and skin protection when handling. Store at room temperatures and out of direct sunlight. Eye Irritant! Do not freeze or expose to temperatures under 40 °F.

ADVANTAGES:

Premium concentrate goes the distance performing on old or new surfaces.

Added silicone-polymer noticeably increases repellency and shine!

Produces appealing orange crème or wild cherry scent!

Cold weather stable!

Use in low or high pressure applications.

DILUTION RATIOS:

Low Pressure: Dilute 1:200-500+ (15-25 mL).

High Pressure: Inject 1.5-3 oz / car.

Concentration will depend on the amount of water on the surface. Adjust until optimal performance is achieved. Start strong and slowly decrease concentration to pin point the best performance and application cost.

Excellent high pressure performance!
